

## About us

ICRC-Weyer is an owner-managed contract research organisation and consulting firm with 25 years of history, based in Berlin. To our clients from the international pharmaceutical and medical device sectors, we offer functional and consulting services, covering the product life cycle from clinical development to post-marketing. Medical writing, biostatistics, and data management are among the core services of our portfolio. The satisfaction of our clients and the well-being of our employees are our top priority and the key to our success. You are invited to be a part of that! We are currently looking for:

## Biostatistician (f/m/x)

office-based in Berlin or remote in Germany

### Your responsibilities

- Planning and performance of statistical analyses for phase I-IV clinical trials, medical device and observational studies
- Creation and review of relevant clinical trial documents (e.g. SAPs, TFLs, ...)
